Education

- Phd Organic
Chemistry
University of Wah
2013

Dr. Faisal Nawaz, Associate Professor and Consultant, University of Wah

Emerging Areas of Interest

- Research and Development (R&D) Consulting
- Academic and Research Consultancy
- Analytical Chemistry Consulting
- Materials Science Consulting

Professional Summary

Experienced PhD in Chemistry with 15 years of expertise offering consultancy across diverse industries. Specializes in R&D, regulatory compliance, product development, analytical chemistry, environmental sustainability, and intellectual property. Provides strategic guidance in drug development, materials science, and supply chain optimization. Skilled in grant writing, technology transfer, and expert witness services, delivering tailored solutions to complex challenges.

Key Skills and Strengths

- **Advanced Research and Development:** Expertise in designing innovative chemical processes, product development, and technology transfer from lab to commercial scale.
- **Regulatory and Compliance Expertise:** Deep knowledge of regulatory affairs, environmental safety, and industry standards in pharmaceuticals, chemicals, and biotechnology.
- **Analytical Chemistry Proficiency:** Skilled in developing analytical methods, utilizing advanced instrumentation, and ensuring quality control in manufacturing processes.
- **Strategic Business and Market Insight:** Strong ability to guide startups and established businesses in market positioning, competitive intelligence, and intellectual property management.

Recognitions

- **Published Research:** Authored numerous peer-reviewed articles in leading scientific journals, contributing to advancements in chemical research and development.
- **Expert Speaker:** Invited to present at national and international conferences, sharing expertise on advanced chemistry topics and industry trends.

Memberships and Affiliations

- Member, Pakistan Chemical Societies

Availability and Consulting Terms: Available for both short-term and long-term consultancy projects. Flexible terms, including hourly or project-based rates, tailored to client needs.
